

Bio

At a very early age, Brian Jaeger developed a passion for art. Growing up in Suburban Detroit with his parents and older sister, he turned first to the art of magic with the help of a Fisher Price Magic Set. His practice of magic continued, but as Brian started high school, he added skills in the art of creative problem solving and the art of debate. Brian began his college career at Oakland University as an undeclared major, but with an interest in computer science. Without a concentrated focus, He found himself uninspired by schoolwork. After taking a little time off from school, Brian recognized his interest in art and technology could be a career focus. He went back to school and earned an Associates degree in 3D Art and Animation from Macomb Community College. An internship opportunity led Brian to start a job with the Technology Department of Anchor Bay School District, where he has been employed for the last eight years. In his spare time, he taught himself website creation and honed his Photoshop skills to expert level. One evening, Brian met a young architectural intern and began a relationship. Three years later, with the help of a magic trick involving a piece of coal and a diamond ring, he proposed to his girlfriend. Brian is now engaged to be married in the fall 2011.
